Peer Review Report

Peer review report 1 on “Supraclavicular block versus interscalene brachial plexus block for shoulder surgery: A meta-analysis of clinical control trials”

1. Original submission

1.1. Recommendation

Accept.

1.2. Comments to the author

Suprascapular nerve block is becoming more popular as successful treatment results are started to be published in the English speaking literature. It is an effective and rather easy procedure to perform with less morbidity comparing to interscalene block and

authors displayed the effectiveness of the procedure in their meticulous work.
